

**IN THE SPECIFICATION**

Please amend the paragraph on page 10, lines 12-17 as follows:

A read control portion 33 is supplied with the synchronization signal SYb from the control portion 50 and, based on this supplied synchronization signal [[STb]] SYb, generates a read clock signal CKR and a read control signal SER which are used to read an image signal written into the image-signal-holding portion 31 and supplies them to the image-signal-holding portion 31.
